

CompTIA A+

A+1202: CompTIA A+ Core 2 Certification Training (Exam 220-1202)

\$2,495.00

- 5 Days
- Student Guide mapped to A+ Core 2 exam objectives (220-1202)
- Lab scenarios aligned with CompTIA exam objectives (220-1202)
- Gradable hands-on assessments provide an accurate picture of your ability to correctly and efficiently perform job tasks
- Comprehensive study material with 100% coverage of the exam objectives
- Video demonstrations of key activities
- Practice questions that check for understanding
- Access to the CompTIA Learning Center

Upcoming Dates

May 18 - May 22

Sep 14 - Sep 18

Course Description

CompTIA A+ (220-1201/1202) is the industry standard for launching IT careers into today's digital world. This updated certification covers essential skills in hardware, software, networking, and troubleshooting, ensuring that students are prepared for a wide range of IT roles.

Note: CompTIA A+ 1202 Certification Prep (Exam 220-1202) is the replacement course for CompTIA A+ 1102 Certification Prep (Exam 220-1102), which is scheduled to retire in September 2025.

Course Outline

Operating systems

- OS installation: working with Windows, macOS, Linux, and mobile operating systems.
- Windows tools: managing systems with Task Manager, Command Prompt, and Disk Management.
- File systems: handling file systems, updates, and OS upgrades.

Security

- Security measures: using encryption, access controls, and wireless security protocols.
- Malware prevention: detecting, removing, and preventing malware threats.

Software troubleshooting

- OS issues: diagnosing and resolving problems with operating systems and applications.
- Mobile troubleshooting: addressing connectivity, app, and performance issues.
- Security concerns: fixing unauthorized access and malware issues.

Operational procedures

- Documentation: using best practices for system changes and documentation.

- Safety and communication: following safety protocols and communicating effectively.
- Backup and recovery: setting up workstation backups and recovery processes.

Audience

The Official CompTIA A+ Core 1 (Exam 220-1202) is the primary course you will need to take if your job responsibilities include supporting the use of PCs, mobile devices, and printers within a corporate or small office home office (SOHO) network. You can take this course to prepare for the CompTIA A+ Core 1 (Exam 220-1202) certification examination.

Prerequisites

To ensure your success in this course, you should have 12 months of hands-on experience working in a help desk technician, desktop support technician, or field service technician job role.

What You Will Learn

Hardware - Identifying, using and connecting hardware components and devices, including the broad knowledge about different devices that is now necessary to support the remote workforce

Operating Systems - Install and support Windows OS including command line and client support, system configuration imaging and troubleshooting for Mac OS, Chrome OS, Android and Linux OS

Software Troubleshooting - Troubleshoot PC and mobile device issues including common OS, malware and security issues

Networking - Explain types of networks and connections including TCP/IP, WIFI and SOHO

Troubleshooting - Troubleshoot real-world device and network issues quickly and efficiently

Security - Identify and protect against security vulnerabilities for devices and their network connections

Mobile Devices - Install and configure laptops and other mobile devices and support applications to ensure connectivity for end users

Virtualization and Cloud Computing - Compare and contrast cloud computing concepts and set up client-side virtualization

Operational Procedures - Follow best practices for safety, environmental impacts, and communication and professionalism
